Our Proposal

We understand how hard it is to find the right web development partner and we're glad to know that you have chosen our team to work with you on your web development project.

Thank you very much for considering our offer!

Project Scope

A comprehensive web development project that includes designing, developing, and deploying a custom website to meet your company's requirements. The project is divided into three phases: Foundation Development, CMS, and NMS. Each phase will cover distinct objectives and deliverables, ensuring the project progresses smoothly and meets all functional needs.

Phase 1: Foundation Development

1. Front-End Development

- **Landing Page:** Design and implement the main layout and landing page components.
- **Field Training Page:** Develop a page displaying all training programs provided by the company.
- **About Us Page:** Design an informative About Us page showcasing the company's history and achievements.

2. Back-End Server Setup

- **Route Testing and Development:** Implement and test essential API routes for the back-end.
- **Database Connection and API Integration:** Establish the connection between the server and the database for efficient data fetching, insertion, and manipulation.

3. Database Design

- **Entity-Relationship Diagram (ERD):** Design and finalize an ERD to model the relationships between key entities.
- **Database Creation:** Set up the database schema based on the ERD, including necessary tables, fields, and relationships.

4. Testing

- **UI Responsiveness Testing:** Ensure the UI is responsive across various devices and screen sizes.
- **Unit Testing:** Perform unit testing for essential components to verify functionality and reliability.

Phase 2: CMS Development

Full details can be provided after submitting first phase.

Phase 3: NMS Integration

Full details can be provided at a later stage.
